

CSC336 Lab Mid

CLO- 4 (Apply the concepts of markup & scripting languages and client-side technologies.)

Marks: 25

Q: Design an HTML page layout as given in the figure below by using Bootstrap 5 (NOT CSS) and apply the following instructions:

- Create a header that will cover 100% width with padding (1), background-color (cyan), text alignment (center), margin (1), and displays the “HASNAIN IQBAL (FA20-BSE-999) Web Portal” by using display (3) and text-color (red).
 - Here you will show your name and registration number in the header section.
- Create buttons that will cover 100% width, text alignment (center), and apply the colors as shown in the given figure.
- Create a slideshow that will cover 100% width with margin (1) by using indicators, left and right controls icons and apply at minimum any three images with their image heading and description.
 - Here image's height must have between 125px to 150px (for displaying a better interface for users).
- Create four unequal responsive sections (2, 6, 2, and 2) and apply the following;
 - The left section will consist of a larger button group with text alignment (center), background-color (green), and text color (white).

- The main body section will display a welcome message “Welcome to Web Portal” by using display (6) and text-color (blue). Whereas you can show any statement in the welcome message description, or the same as shown in the given figure.
- The paid content section will display the message “Paid Content Section” by using display (6), background-color (yellow), and text-color (black).
- The right section will consist of a larger button group with text alignment (center), background-color (red), and text color (white).
- Create a button that will cover 100% width with button color (red), text color (cyan), text alignment (center), and display “HASNAIN IQBAL (FA20-BSE-999), click here for subscribe” in bold.
 - Here you will show your name and registration number for the subscription.

Note:

- **You will design an HTML page layout by using Bootstrap 5 only, NOT CSS.**
- **You must copy the complete HTML Code and take a complete screenshot of the Web Browser Output and submit it in the MS-Word or PDF format only. Whereas, the RAR file will never be accepted.**
